

Iowa ARNG Child and Youth Program Executive Data Brief

Corrected program outcomes from FY20 through FY26 and Facebook performance available in the September 21 2026 database pull

8,188 FY26 YOUTH ATTENDANCE	160.5 FY26 YOUTH PER EVENT	1,802 2026 FACEBOOK ENGAGEMENT	1,834 LATEST FACEBOOK FOLLOWERS
---	--	--	---

What the data shows

FY26 produced the strongest recorded youth attendance. The corrected database reports 8,188 youth, up from 1,136 in FY25. That is a gain of 7,052 youth, or 620.8 percent.

Reach increased faster than activity volume. Completed or reporting-complete events rose from 43 in FY25 to 51 in FY26, while program hours rose from 240.8 to 311.5. Youth per event increased from 26.4 to 160.5.

Facebook performance strengthened in 2025 and 2026. Engagement increased from 1,405 in 2024 to 1,851 in 2025. Through September 16, 2026, engagement had already reached 1,802. Engagement per post improved from 10.6 in 2024 to 13.1 in 2025 and 14.8 in 2026 to date.

Audience growth continued. Available follower records show 1,693 followers at the end of 2024, 1,763 at the end of 2025, and 1,834 by September 2026.

Evidence of effective management

Management focus	Evidence in the data	Why it matters
Program reach	FY26 youth attendance reached 8,188	Documents the strongest youth reach in the series
Event effectiveness	160.5 youth per event in FY26	Shows substantially greater reach per completed event
Digital communication	2026 engagement per post reached 14.8	Indicates improving content performance
Measurement discipline	Program and social records now support annual comparisons	Creates a basis for planning and accountability

How I would use these findings

I would identify the program formats associated with the strongest participation, preserve the digital practices associated with higher engagement, and standardize attendance, family, and program-hour reporting.

Data notes

The September 21 database pull includes 51 completed or reporting-complete FY26 events, 8,188 youth, and 311.5 program hours. FY26 has not yet ended. Historical Facebook views are not directly comparable because Meta's metric availability changed. Follower values before 2024 were backfilled and do not represent measured annual growth. Family counts use the available reporting baseline and require consistent definitions.
